INTERESTS & ATTITUDES

- ▶ Open Source Contributions
- ▶ UI/UX Design Exploration
- ▶ Tech Community Mentoring
- ▶ Reading Engineering Blogs
- ▶ Problem-first Thinking
- ▶ Ownership & Accountability
- ▶ Continuous Self-improvement

Divinegift C. Onumajuru

FRONTEND & MOBILE DEVELOPER

01 Professional Summary

Frontend & Mobile Developer with **2+ years** delivering production-grade applications across fintech and real estate — from agency banking POS systems to full-stack property platforms. Proficient in React.js, Vue.js, Next.js, React Native, and Kotlin (Jetpack Compose). Known for measurable impact: **30% faster load times**, **20% higher engagement**, and a **0% post-release bug rate** across multiple launches. I own problems end-to-end — from architecture and database design to deployment and monitoring — and I ship things that work.

02 Professional Experience

Front-End Developer

Nov 2025 - Present

LINTINT TECHNOLOGY LIMITED

4C Romanus Orji, Southern View Estate, Lekki, Lagos

KEY RESPONSIBILITIES

- Develop frontend modules for a Core Banking web app using Vue.js, TypeScript, and Nuxt.js with reusable components and RESTful API integrations.
- Build scalable mobile features for the MonieField Android app in Kotlin with Jetpack Compose and Ktor.
- Apply CI/CD pipelines (GitHub Actions) and maintain rigorous testing throughout each release cycle.

KEY ACHIEVEMENTS

- ✓ Accelerated cross-platform delivery by establishing shared testing and CI/CD standards across two concurrent projects.
- ✓ Successfully shipped mobile features to the MonieField Android app ahead of the project's strategic pause.

Front-End Developer

Jun 2024 - Nov 2025

MONIEVAULT

Holy Family Junction Nekede, Owerri West, Imo State

KEY RESPONSIBILITIES

- Architected and maintained reusable, WCAG 2.1 AA-compliant UI components in React.js and Vue.js with TypeScript.
- Implemented performance optimisations (code splitting, lazy loading, image optimisation) in Next.js, measured via Lighthouse and Web Vitals.
- Wrote comprehensive unit and integration tests using Jest and React Testing Library across all major updates.
- Introduced Git workflows and CI/CD pipelines (GitHub Actions) to streamline team collaboration.

KEY ACHIEVEMENTS

- ✓ Boosted user engagement by 20% across the banking app and Agency (POS) App.
- ✓ Reduced frontend load times by 30% measured via Lighthouse and Web Vitals audits.
- ✓ Achieved a 0% post-release bug rate across three major product updates.
- ✓ Increased customer satisfaction by 15% through responsive, predictable state management.
- ✓ Delivered 2+ high-performance applications on a tight 6-week timeline.

Freelance Full-Stack Developer

2026

SURECITY PROPERTIES

Remote · Client Project

KEY RESPONSIBILITIES

- Sole developer responsible for full system architecture, development, and live deployment of a production real estate platform on Vercel.
- Built a secure multi-role authentication system (admin, staff, client) with role-based access control and server-side passcode verification.
- Architected a PostgreSQL database with Row Level Security (RLS) policies, ensuring data protection at the database level.
- Integrated Resend SMTP for transactional email delivery including newsletter subscriptions and user notifications.
- Built a full admin dashboard with user management (create/update/delete), property analytics, and enquiry tracking.
- Developed a newsletter subscription system with duplicate detection, RLS-compliant insert policies, and welcome email automation.
- Implemented a complete enquiry/contact management system with status tracking (new/read/replied) for staff and admin.

KEY ACHIEVEMENTS

- ✓ Delivered a fully responsive, production-ready platform with property management dashboard, dark/light mode, and custom branding — end-to-end, solo.
- ✓ Eliminated client-side security vulnerabilities by migrating sensitive credentials server-side and enforcing Supabase RLS across all tables.
- ✓ Reduced admin overhead by building an automated staff/admin account creation flow, removing the need for public role-based signup.
- ✓ Resolved multiple production authentication and email delivery failures through systematic debugging of Supabase auth config, SMTP settings, and RLS policies.

SOFT SKILLS

- Team Collaboration
- Critical Thinking
- Technical Documentation
- Time Management
- Problem Ownership
- Attention to Detail
- Adaptability

LANGUAGES

English — Fluent
Igbo — Native

03 Education

Bachelor of Technology, Computer Science

Federal University of Technology Owerri, Imo State

Sep 2019 – Nov 2024

2nd Class Upper

04 Notable Achievements

✓ Redesigned a web application UI resulting in a 25% increase in user engagement and retention.

✓ Identified and resolved critical production bugs, maintaining 100% uptime for key application features.

✓ Led development and deployment of a responsive web application within a 6-week deadline.

✓ Reduced time-to-market by 20% by collaborating effectively with cross-functional teams.

✓ Optimised frontend codebase, reducing load times by 30% and improving overall performance.

✓ Enhanced mobile app UX, increasing customer satisfaction ratings by 15% based on user feedback surveys.

05 Continuous Development

✓ C# & .NET Ecosystem

Expanding into enterprise application development and backend architecture with C# and the .NET ecosystem.

✓ Python — Deepening Proficiency

Moving beyond scripting into data pipelines and automation — building a stronger, more confident foundation.
